Shrubs, Trees and Evergreens

WE have endeavored to list in our 1930 catalog, Trees, Shrubs, Evergreens and Vines that are adapted to our Western climate. In some instances, where their beauty makes a trial desirable, we list those that sometimes are not perfectly hardy.

Our Evergreens are especially fine.

If you are particularly anxious to secure picturesque effects in your landscaping, without waiting, let us quote you on Larger Sizes of Trees, Shrubs and Evergreens than those listed. These specimens have had special care in our nursery, and can be moved without loss of time. The small additional cost will surprise you.

These quotations cover delivery in or near Denver, but do not include cost of planting. At your request we will have a competent man do your planting. The approximate charge is 20% of the cost of the plants.

Read Our Guarantee on Inside Back Cover

This Catalog is Our Only Solicitor

We do not maintain a landscape department for designing, but we are always pleased to give any informal information we can. A telephone or written request will receive our prompt attention.

If you have maintenance troubles call on THE ROBERTS ROSE COMPANY for "*First Aid to your Gardens.*" We are in constant touch with trained men who can give your garden the necessary personal attention.

SHRUBS

Shrubs, as a rule, grow so easily and produce so much beauty quickly that they are indispensable for out door decorations.

There are so many varieties to choose from that it is not difficult to put the right shrub in the right place.

Blossoms in all colors, plants all heights and shapes, and foliage in a wonderful variety. No wonder they are increasing in popularity every year.

A wise buyer watches for good roots. Plant about three feet apart for most varieties. Wide spreading kinds use four feet each way. Don't expect too many blossoms the first year.

ARALIA. *Acanthopanax pentaphyllum*. Grows 6 to 8 feet high. Planted for the effect given by its abundant shiny green foliage. Will grow anywhere and the lobed leaves and color are very effective in mass planting. Branches spiny.

3 to 4 feet.....	\$1.00 each
4 to 5 feet.....	1.25 each

BARBERRY, JAPANESE. *Berberis thunbergii*. This splendid little shrub should be found in nearly every planting with its fine foliage and bright red berries that persist thru Winter until Spring. Useful in low hedge planting where some formality is desired.

Hedging size.....	\$2.50 per 10
18 to 24 inch.....	.50 each
2 to 2½ feet.....	.65 each
2½ to 3 feet.....	.75 each

BARBERRY, NEW RED LEAVED. A fine new variety with bright red leaves. A splendid contribution to horticulture. Use with a good color scheme in planting. No other shrub of short stature will give as much satisfaction as this one. The leaves show up like brilliant blossoms if given a good place in the sun.

18 to 24 inch.....	\$1.25 each
--------------------	-------------

BLADDER SENNA. *Colutea arborescens*. An exceptional shrub, 6 to 10 feet. Fine textured foliage. Blossoms yellowish brown in summer followed by large inflated seed pods resembling a bladder. Prefers sunny location.

3 to 4 feet.....	\$1.25 each
------------------	-------------

BUCKTHORN, GLOSSY. *Rhamnus frangula*. A sturdy shrub with shining foliage, turning to beautiful autumnal tints. Fruit bright red turning to black. Attractive to birds. Attains a height over 10 feet. Grows anywhere. Blooms late June. Very hardy.

2 to 3 feet.....	\$.80 each
3 to 4 feet.....	1.00 each
4 to 5 feet.....	1.25 each

BUTTERFLY BUSH. *Buddleya magnifica*. A beautiful rapid growing shrub with lilac blossoms from midsummer until frost. Dies down each Winter but grows from four to six feet. A beautiful specimen plant.

In 4-inch pots.....	\$.50 each
---------------------	-------------

BUFFALO BERRY. *Shepherdia argentea*. An easily grown large shrub to be planted for contrast. Almost a tree. Resembles Russian Olive with its silvery branches and leaves though fruit is a bright red and persists well into the Winter and are edible. Should be used as a specimen or on background to relieve color monotony.

3 to 4 feet.....\$1.00 each

CHERRY, Western Sand. *Prunus Besseyi*. One of the showiest low growing fall shrubs, leaves turning brilliant red. White flowers in spring all along stems. Fruit much prized for pies and jell. Spreading habit. Hardy.

3 to 4 feet.....\$.85 each

CHERRIES. For fruits, see page (20).

CHOKEBERRY, RED. *Aronia arbutifolia*. Tall growing, good for background in mass planting. White flowers followed by showy red berries. Perfectly hardy. A very valuable shrub.

2 to 3 feet.....\$1.25 each

CHOKEBERRY, BLACK. *Aronia melanocarpa*. Very similar to the above, with black berries. Foliage pale green.

2 to 3 feet.....\$1.00 each

CHOKEBERRY, Brilliant. *Aronia brilliantissima*. Larger foliage and brighter berries than *Aronia arbutifolia*. A splendid new shrub.

2 to 3 feet.....\$1.50 each

CINQUEFOIL. *Potentilla fruticosa*. Bright yellow flowers all Summer on gracefully spreading branches. Height about 4 feet in good soil, but grows anywhere. One of the most satisfactory shrubs in the garden. Splendid for wet places and will do well in shade.

18 to 24 inch.....\$.80 each

2 to 2½ feet..... 1.00 each

COTONEASTER, acutifolia. A dense growing shrub, sometimes 8 feet in height. Dark green leaves that adhere until late fall. The black fruit persists throughout the winter.

2 to 3 feet.....\$1.00 each

COTONEASTER, SPREADING. *Cotoneaster divaricata*. A very handsome shrub studded with bright red fruits in Fall. Upright growth to 6 feet and dark green leaves.

2 to 3 feet.....\$1.25 each

DESMODIUM. *Pendulifolium*. A very graceful shrub with slender arching stems and pendulous blue blossoms in Autumn. Nearly always dies back in Winter, but makes a splendid growth each year.

2 to 3 feet.....\$1.00 each

3 to 4 feet..... 1.25 each

DEUTZIA, PRIDE OF ROCHESTER. An exceedingly beautiful shrub but not quite hardy here, though there are some very beautiful specimens in the City of Denver. This variety is the hardiest and one of the most beautiful. Flowers are pinkish white with the underside of the petals rose and borne on drooping panicles. Very worthy of the care they demand. Soil must be well drained but kept moist.

2 to 3 feet.....\$1.25 each

THE DOGWOODS. CORNUS

These hardy, ornamental shrubs, with handsome foliage, usually assuming brilliant fall colorings, are very desirable for shrubbery planting. Their brightly colored branches in winter make a pleasing contrast with the green of the Evergreens. Will thrive under large trees as well as full sun. If the old wood is cut out from time to time more brilliant coloring is assured.

COLORADO DOGWOOD. *Cornus coloradensis*. A native spreading shrub with fine red stems holding color better than other varieties.

2 to 3 feet.....\$.90 each
3 to 4 feet..... 1.00 each

RED STEM DOGWOOD. *Cornus siberica alba*. Spreading shrub with white flowers followed by blue fruit. Valuable for the coral red bark in Winter. Almost never fails and one of the most satisfactory shrubs in existence for mass planting.

2 to 3 feet.....\$.75 each
3 to 4 feet..... .85 each

RED OSIER DOGWOOD. *Cornus stolonifera*. Dark red branches with white flowers and fruit. Plant in dark corner to brighten up otherwise dull color scheme. Very valuable for Winter color.

2 to 3 feet.....\$.65 each
3 to 4 feet..... .75 each
4 to 5 feet..... .85 each

YELLOW DOGWOOD. *Cornus flaviramea*. This is an excellent shrub to plant with red bark varieties or to relieve other shrubs. Splendid yellow, Winter color.

2 to 3 feet.....\$.75 each
3 to 4 feet..... .85 each

DYERS GREENWOOD. *Genista tinctoria*. A fine small shrub growing 3 to 6 feet high with striped twigs, green stems and a profusion of yellow flowers in Spring. Plant in masses for good effect. Especially valuable as a back ground for other flowering plants.

2 to 3 feet.....\$1.00 each

ELDERBERRY, COMMON. *Sambucus canadensis*. Valued for its ability to grow splendidly in deep shade, though it does equally as well in full sun. A tall, easily grown shrub with excellent foliage. The fruit is edible. Attracts birds. Very fragrant. Fine for screens and naturalistic planting.

3 to 4 feet.....\$.85 each

ELDERBERRY, CUT LEAF. *Sambucus canadensis acutiloba*. One of the finest large shrubs in cultivation. Rapid grower with white fragrant flowers followed by large racemes of blue fruit and finely cut foliage. Splendid plant for screen or back ground.

3 to 4 feet.....\$1.00 each
4 to 5 feet..... 1.25 each

ELDERBERRY, GOLDEN. *Sambucus aurea*. Of upright growth with large yellow leaves creating lovely contrasts of foliage colors.

3 to 4 feet.....\$1.00 each

ELDERBERRY, RED BERRIED. *Sambucus pubens.*

Much like the above with fine foliage and an abundance of red berries. A great attraction to birds.

3 to 4 feet.....\$1.00 each

EVONYMOUS, EUROPEA. Spindle Tree. Also known as Strawberry Bush. 12 to 15 feet high. Tall erect shrub with narrow leaves that persist late if kept moist. Its peculiar spindle like growth allows close planting to walls. Bears an abundance of bright red berries late in Summer.

EVONYMOUS, BURNING BUSH OR WAHOO. *Atropurpurea.* Resembles above but with purplish leaves and red berries in heart shaped pod. Splendid all around shrub.

EVONYMOUS, WINGED . *Evonymous alatus.* A tall growing shrub to 8 feet, with broad corky wings along the branches. Brown and orange berries in late Summer. An unusual shrub.

3 to 4 feet.....\$1.75 each

EVONYMOUS, YEDDO. *Evonymous yedoensis.* Similar to europe, with finer appearing crimson fruit in an orange lined pod. Grows to 10 feet. Very beautiful Fall shrub.

3 to 4 feet.....\$1.50 each

FLOWERING ALMOND. *Prunus glandulosa sinensis.* One of the first spring blooming shrubs and very popular for garden and lawn planting. Blossoms either double white or pink. Very showy. Hardy.

2 to 3 feet.....\$1.00 each

3 to 4 feet..... 1.25 each

FLOWERING CURRANT. *Ribes aureum.* One of the old garden favorites. 4 to 5 feet high. Yellow blossoms with spicy odor in late Spring. Foliage bright green and very effective among dark foliage plants. Excellent for foundation planting, for undergrowth planting or in shade.

3 to 4 feet.....\$.85 each

Also *Ribes alpinum*, a rare dwarf variety.

2 to 3 feet.....\$1.00 each

Currants, for fruit see page (21).

GOLDEN BELLS. FORSYTHIA.

Should be in every planting. Star-like yellow flowers in great profusion appearing before the leaves. The lustrous deep green foliage remains a thing of beauty long after the disappearance of the blooms. The blossoms of all the following varieties are somewhat similar and appear very early in Spring.

HYBRID GOLDEN BELL. *Forsythia intermedia.* Medium shrub to 8 feet. Long pendulous branches bearing yellow blossoms before the leaves appear.

2 to 3 feet.....\$.80 each

3 to 4 feet..... .90 each

FORTUNES GOLDEN BELL. *Forsythia fortunei*. The earliest flowering shrub. Golden yellow blossoms followed by lustrous green foliage. Very satisfactory in mass plantings.

2 to 3 feet.....\$.80 each
 3 to 4 feet......90 each

SUSPensa, GOLDEN BELL. *Forsythia suspensa*. One of the most valuable very early spring flowering shrubs. Especially valuable for walls and fences. Graceful drooping branches.

2 to 3 feet.....\$.80 each
 3 to 4 feet......90 each

GOLD TWIG, GOLDEN BELL. *Forsythia virdissima*. Similar to above with bright golden yellow branches. Good for winter effect.

2 to 3 feet.....\$.80 each
 3 to 4 feet......90 each

HAZEL. *Corylus americana*. 6 to 9 feet high. Tall growing shrub with splendid foliage and bearing hazel nuts in Fall. Fine background for flowers. Not always hardy in Denver.

2 to 3 feet.....\$1.00 each
 3 to 4 feet..... 1.25 each

HERCULUS CLUB. *Aralia spinosa*. A large leaved spiny shrub, growing to 25 feet. Will grow anywhere in the sun or partial shade. Very upright shrub and can be used against any sort of wall or as a specimen.

2 to 3 feet.....\$.85 each
 3 to 4 feet..... 1.00 each

THE HONEYSUCKLES. LONICERA.

These handsome shrubs with their fine foliage, fragrant blossoms and showy fruit should be found in every shrubbery grouping. Easy to transplant and free from insects they prove to be a most satisfactory horticultural family. All are of erect habit.

WHITE BELLE HONEYSUCKLE. *Lonicera bella alba*. Erect shrub to 10 feet with whitish bark, white to pink flowers and red fruit. Close grower.

3 to 4 feet.....\$.85 each
 4 to 5 feet..... 1.00 each

CORALLINE HONEYSUCKLE. *Lonicera chrysantha*. Tall, strong growing shrub to 10 feet with coral blossoms in May and June. Followed by handsome masses of red fruits in autumn stays green thru very dry spells. Very satisfactory.

2 to 3 feet.....\$.75 each
 3 to 4 feet......90 each

FRAGRANT HONEYSUCKLE. *Lonicera fragrantissima*. 10 to 12 feet. Delightfully fragrant white flowers in May. Broad, open branching shrub.

2 to 3 feet.....\$.75 each
 3 to 4 feet......90 each

MORROWS HONEYSUCKLE. *Lonicera morrowi*. A spreading honeysuckle with an abundance of creamy white blossoms followed by red berries.

2 to 3 feet.....\$.70 each
3 to 4 feet......85 each

RED TATARICAN HONEYSUCKLE. *Lonicera tatarica rosea*. Same as the above except blossom is red and fruits orange. One of the most used varieties and found everywhere in Denver.

2 to 3 feet.....\$.70 each
3 to 4 feet......85 each

WHITE TATARICAN HONEYSUCKLE. *Lonicera tatarica* gr. fl. A pinkish white, large flowered variety of above. Very satisfactory.

2 to 3 feet.....\$.70 each
3 to 4 feet......85 each

HYDRANGEA, PEE GEE. *H. paniculata*. The most common variety of this beautiful little shrub with the familiar clusters of immense white flowers. Plant in shade.

2 to 2½ feet.....\$1.00 each

HYDRANGEA, HILLS OF SNOW. *H. aborescens*. Much like the above with flowers in flat racemes. Shade.

2 to 2½ feet.....\$1.00 each

INDIGO BUSH, FALSE. *Amorpha fruticosa*. A handsome shrub 3 to 5 feet high with fine feathery foliage and dark blue flowers in May and June. Useful in mass and foundation planting to give successive bloom. Plant in sun. Fine specimen plant.

2 to 3 feet.....\$.85 each
3 to 4 feet..... 1.00 each

JET BEAD. *Rhodotypus kerriodes*. One of the best graceful white flowered shrubs 4 to 5 feet high. Blooming in June. Pendulous branches remain bright green throughout the Winter. Black fruit that adheres thru Winter until Spring. Can be used as a specimen plant.

2 to 3 feet.....\$1.00 each

JAPANESE OLEASTER. *Eleagnus longipes*. Grows 6 to 10 feet. Silvery leaves spotted brown underneath. Leaves are persistent and shrub has a profusion of red berries toward Fall making a striking appearance.

2 to 3 feet.....\$1.50 each

JAPANESE QUINCE. *Cydonia japonica*. A showy shrub that should be in every garden. Dazzling scarlet flowers in early spring. Foliage glossy green, few scattering thorns on stems. Very hardy.

18 to 24 inch.....\$.80 each
2 to 3 feet......90 each

LILAC. SYRINGAS.

Probably the best known of all shrubs and should be in every garden. Showy and fragrant when in blossom. Useful for screen planting. The following varieties are the most satisfactory to plant.

ROUEN LILAC. *Syringa rothomagensis chinesis.* Up to 12 feet. Early blooms of purple on arching branches. Very fragrant and graceful.

2 to 3 feet.....\$1.00 each
3 to 4 feet..... 1.25 each

HUNGARIAN LILAC. *Syringa josikea.* Up to 12 feet. Violet blooms in June. Very compact heads. Almost sure to bloom regardless of late frosts.

2 to 3 feet.....\$1.00 each
3 to 4 feet..... 1.25 each

PERSIAN LILAC. *Syringa persica.* 5 to 10 feet. Profusion of pale lilac or white blooms. The most popular of the older named varieties and splendid for screen planting.

2 to 3 feet.....\$1.00 each
3 to 4 feet..... 1.25 each

COMMON PURPLE LILAC. *Syringa vulgaris.* The old fashioned favorite with purple blossoms.

3 to 4 feet.....\$1.00 each

COMMON WHITE LILAC. *Syringa vulgaris alba.* Same as above except lighter colored foliage and white blossoms.

3 to 4 feet.....\$1.00 each

"Prune lilacs for form only; but keep down suckers."

BUDDED LILACS. Named varieties. Perfection in Lilac blossom. These hybrids are all true colors, beautifully formed and fragrant. You can purchase your favorite color and be sure of getting it. This list includes the best proven varieties.

HYBRIDA, CHAS. X. Purplish red.

LUDWIG SPAETH. Single red.

PRES. GREVY. Double blue.

MME LE MOINE. Large double white.

MARIE LE GRAYE. Single white.

CHAS. JOLY. Violet and wine purple.

2 to 3 feet.....\$1.50 each
3 to 4 feet..... 1.75 each

MOCK ORANGE

PHILADELPHUS

These old fashioned beauties with their white flowers full of fragrance, graceful branching and beautiful foliage can be included in all sorts of planting. Not particular as to soil but most varieties should be in sun. Easily transplanted and are sure to add large returns in beauty and satisfaction to the home owner. Splendid as specimen plants or centres of shrubbery groups.

GARLAND MOCK ORANGE. *Philadelphus coronarius.* Stately shrub about 7 feet high with large white fragrant blossoms. A splendid screen plant.

2 to 3 feet.....\$.80 each
3 to 4 feet..... .90 each

LARGE FLOWERED MOCK ORANGE. *Philadelphus coronarius* gr. fl. Flowers larger but not so fragrant. June. Branches drooping.

3 to 4 feet.....\$.85 each
4 to 5 feet..... 1.00 each

LEMOINES MOCK ORANGE. *Philadelphus lemoine*. Grows to 6 feet. A dignified shrub with very fragrant white blossoms in late June to mid-summer. Not such a strong grower but hardy and very desirable.

18 to 24 inch.....\$.75 each
2 to 3 feet..... .85 each
3 to 4 feet..... 1.00 each

DROOPING MOCK ORANGE. *Philadelphus avalanche lemoine*. A graceful shrub to 5 feet with slender arching branches covered with an abundance of white flowers. Very valuable in any grouping.

18 to 24 inch.....\$.75 each
2 to 3 feet..... .85 each

VIRGIN MOCK ORANGE. *Philadelphus virginale* fl. pl. One of the finest of new shrubs. Great masses of double white flowers in early Summer and usually with scattered bloom until Fall. Foliage of a deep green making a perfect background for the bloom.

2 to 3 feet.....\$1.00 each
3 to 4 feet..... 1.25 each

ZEYHER'S MOCK ORANGE. *Philadelphus zeyheri*. Easily grown tall shrub with fragrant white flowers. Grows to 12 feet and blooms two weeks later than *Philadelphus lemoine*. Excellent for succession blossoming. Fast growing.

3 to 4 feet.....\$.85 each
4 to 5 feet..... 1.00 each

NINEBARK. *Physocarpus opulifolius*. Grows 8 to 10 feet. One of the best late Summer shrubs. With greenish white flowers in corymbs on arching branches followed by red fruit. Perfectly hardy, stands some shade and makes a splendid screen. Leaves attractive dark green in color.

3 to 4 feet.....\$.85 each
4 to 5 feet..... 1.00 each

Also *P. nana* and *P. O. Aurea*.

Dwarf flowering trees are always a source of satisfaction.

PLUM, DOUBLE FLOWERING. *Prunus triloba plena*. Double pink flowers appearing just before the leaves in May or June. Grows 4 to 5 feet. One of the finest of the small flowering trees. Splendid massed against tall evergreens.

3 to 4 feet.....\$1.25 each
4 to 5 feet..... 1.50 each

PLUM, PURPLE LEAF. *Prunus pissardi*. A small tree grown for its striking purple foliage and splendid shape. Flowers are pale pink and not so numerous as *Prunus triloba*, but a very effective note in the color scheme.

3 to 4 feet.....\$1.25 each
4 to 5 feet..... 1.50 each

PLUM, HANSEN'S PURPLE LEAF. *Prunus cistena*.
 Beautiful purplish red foliage, small pink blossoms
 in early spring. Grows to 8 feet. Very hardy.
 4 to 5 feet.....\$1.50 each

Plums, for fruits see page (20).

Plums, larger tree types, see page (18).

PRIVET. LIGUSTRUM.

This particular group of shrubs is one of the most useful that we have for hedges, screens and in border planting or sheared formal specimens. White flowers blue fruits and of great "shearability". Leaves usually very persistent. Not all adapted to Colorado and surrounding states and we only list the hardy ones.

For other hedge plants see Barberry, page 1, Buckthorn, page 1; Siberian Pea Shrub, page 10; Bridal Wreath, page 11; and Russian Olive, page 10.

AMoor River North Privet. *Ligustrum amurense*. Rapid grower and hardy. The most satisfactory tall growing hedge plant for this locality. Our plants are heavily rooted thus insuring a fine dense hedge.

Hedging	\$1.50 per 10
2½ to 3 feet.....	2.00 per 10
3 to 4 feet.....	3.00 per 10

English Privet. *Ligustrum vulgaris*. The very hardiest of all privets. Makes wonderful hedge or screen and does not die out in Winter. Stands shearing well.

Hedging	\$1.60 per 10
2 to 2½ feet.....	2.00 per 10
3 to 4 feet.....	2.50 per 10

Japanese Privet. *Ligustrum ibota*. One of the hardiest of the dense privets. Leaves persist nearly all Winter. Withstands shearing splendidly. Valuable for the black berries that adhere thru the Winter until Spring. Beautiful specimen plant.

Hedging	\$1.60 per 10
18 to 24 inch.....	2.00 per 10
2 to 2½ feet.....	3.00 per 10

Lodense Privet. *Ligustrum lodense*. A very low growing and dense privet sending out numerous branches for low close cropped hedges. Good in formal work. A new one and very satisfactory.

12 inch hedging.....	\$2.50 per 10
----------------------	---------------

Regals Privet. *Ligustrum regelianum*. Low spreading shrub that can be trimmed to any shape. Desirable for low formal hedges and specimens sheared to shape.

2 to 2½ feet.....	\$.75 each
-------------------	-------------

SEE SPECIAL ROSE CATALOG

for description and price of Hybrid Tea Roses for the Garden.

FIELD ROSES

These roses are to be used as ornamental shrubs as the foliage and fruits are even more charming than the blossoms. Some are very fragrant and all have single blossoms. Very hardy and should be included in every planting.

AUSTRIAN COPPER ROSE. A beautiful bush rose, thoroughly hardy with single copper colored blossoms in June.

2 to 3 feet.....\$1.00 each

BRISTLY ROSE. *Rosa nitida*. Low growing rose suitable for ground cover on slopes, around balustrades, etc. Handsome shiny green foliage. Light pink flowers.

12 to 15 inch.....\$.75 each

GHISLAINE DE FELIGONDE (Pillar). A low growing pillar rose. Orange pink flowers nearly all summer. Very fine.

HUGONIS. One of the fine new bush roses. Should be in every yard large enough to give it the eight feet of space it requires. Early in June it is a mass of yellow. Entirely hardy.

MEADOW ROSE. *Rosa blanda*. Erect growing to 5 feet. Nearly smooth red stems, exquisite Fall foliage, large bright coral red single blossoms followed by showy red fruits. Leaves persist until Winter. Fine for hedge.

2 to 3 feet.....\$.85 each

PRAIRIE ROSE. *Rosa setigera*. Long slender branches full of thorns. Flowers clear pink. Well adapted to planting with other shrubs.

2 to 3 feet.....\$.85 each

RUGOSA ROSE. *Rosa rugosa*. A dwarf Spring bush rose with white, pink or red blossoms. Much used for rose hedges.

2 to 3 feet.....\$1.00 each

SWEET BRIAR ROSE. One of the best known of the old fashioned roses. Both leaves and blossoms are fragrant. Much used as background for fragrant perennials.

2 to 3 feet.....\$.85 each

VIRGINIA ROSE *Rosa lucida*. Tall growing shrub rose with splendid shiny green foliage, bright pink flowers followed by large red fruits giving splendid Winter effect. The best for shrubbery planting.

2 to 3 feet.....\$.75 each

Also **HARRISONS YELLOW, PERSIAN YELLOW** and **SPINOSISSIMA**.

ROSE OF SHARON. *Hibiscus syriacus*. 6 to 10 feet. A very neat and beautiful blossoming shrub. Grows to good height but care must be taken to always obtain the white, pink or carmine as the magenta will not blend with other colors in the garden.

Not always hardy.

2 to 3 feet.....\$1.25 each

RUSSIAN OLIVE. *Eleagnus angustifolia*. Really a small tree. Very well known and deservedly popular shrub for the West. The silvery effect of the leaves is a welcome relief from the solid greens. The blossoms are fragrant and the fruit an olive that is very ornamental. Attract birds. Will grow anywhere.

2 to 3 feet.....\$.90 each

3 to 4 feet.....1.00 each

4 to 5 feet.....1.25 each

For tree form Russian Olive see page (19).

SHAD BUSH. *Amelanchier canadensis*. White flowers in mid Spring followed by red berries that are an attraction to birds. Especially good near evergreens. Will stand a large amount of water and some shade. Grows to 20 feet.

2 to 3 feet.....\$.90 each

SIBERIAN PEA SHRUB. *Caragana arborescens*. One of the most valuable very early flowering shrubs. Grows 6 to 8 feet. Bears pea shaped yellow blossoms in early Spring. Good in mass planting or as a screen. Bark olive green through Winter. Very hardy.

2 to 3 feet.....\$.80 each

3 to 4 feet......90 each

SILVERBERRY. *Eleagnus argentea*. A most excellent shrub growing to 10 feet. Leaves silvery on both sides. Fruit covered with silvery scales. Use to lighten intense green of mass planting.

3 to 4 feet.....\$1.25 each

THE SPIREAS

In this indispensable group of shrubs we find a wonderful variation of style, color, size and time of blooming. There is a spirea for every place and purpose. Summer varieties are especially valuable for they bloom when blossoming shrubs are few. The following are all hardy and easily grown and we may use them anywhere in the planting. See also list of perennials.

SNOW GARLAND SPIREA. *Spiraea arguta*. 4 to 6 feet. The earliest of the free flowering kinds. Valuable in foundation planting and shrubberies.

2 to 3 feet.....\$.90 each

3 to 4 feet..... 1.20 each

BILLARD SPIREA. *Spiraea billardi*. Summer flowering variety of good height. Rose pink blossoms cover bush from July to Fall. A splendid shrub to plant in shade.

2 to 3 feet.....\$.75 each

3 to 4 feet......85 each

VAN HOUTTES BRIDAL WREATH. *Spiraea Van Houtti*. The most showy of all the spireas. White blossoms in large numbers two inches across. Fine foliage on slender branches. Best back ground for flowering plants. Adopted to any style of planting and growing 6 to 8 feet high if planted alone. The most popular member of the family and the best and most popular parking shrub in Denver.

2 to 3 feet.....\$.65 each

3 to 4 feet......75 each

A. WATERER SPIREA. *Spiraea bumaldi* A. Watereri. Low growing, 2 to 4 feet summer blooming sort with rosy blossoms. As soon as the first blooms wither, cut back the flower stems and another crop will appear. Use for low flowering hedges and under low windows; against stucco

15 to 18 inch.....\$1.00 each

FROEBELLS SPIREA. *Spiraea bumaldi froebeli*. Much the same as the above though blooming thru a longer season and blossoms are of a lighter shade. Splendid for edging flower beds. A better shrub than A. Waterer.

2 to 2½ feet.....\$.75 each

JAPANESE WHITE SPIREA. *Spirea japonica ovalifolia*. A Japanese variety growing about 3 feet high with white blossoms. Fine for foundation planting and shrubberies.

15 to 18 inch.....\$.90 each

PINK MEADOW SPIREA. *Spirea latifolia*. A valuable spirea for its blooming period. June until Fall. Grows about 4 feet high with blossoms white and pyramidal. Makes an exceptional subject for borders.

2 to 3 feet.....\$1.00 each

PLUM LEAVED SPIREA. *Spirea prunifolia fl. pl.* Little white flowers in profusion all along the slender branches of this most graceful shrub. Grows to 6 feet. Particularly showy foliage turning orange in Fall. Can be used in groups or as specimens. Blooms early.

2 to 3 feet.....\$1.00 each

THUNBERGS SPIREA. *Spirea thunbergii*. Grows 3 to 6 feet high. One of the best known and most planted. Has an abundance of small white blooms along thread-like twigs making a very graceful shrub. Plant anywhere.

2 to 3 feet.....\$.90 each

WILLOW LEAF SPIREA. *Spirea salicifolia*. Another spirea blooming in early and mid-summer. Blossom is pinkish white and oblong and is very valuable in foundation plantings as it varies greatly in height and blooming period. Should always be included in groups.

2 to 3 feet.....\$.90 each

ASH LEAVED SPIREA. *Sorbaria sorbifolia*. Grows to 6 feet in height. Not a true spirea. Blooms in mid-summer with a lilac shaped blossom in white. Cutting back after first blooms die assures bloom until frost. Foliage very good. Hardy and easily grown.

3 to 4 feet.....\$1.00 each

SNOWBERRY, WHITE. *Symphoricarpus racemosus*. Familiar fine twigged shrub with small leaves and large white spherical berries along branches from June till frost. Grows 3 to 5 feet high and are included in all planting for beauty of the fruit.

2 to 3 feet.....\$.70 each

3 to 4 feet......80 each

SNOWBERRY, RED CORALBERRY. *Symphoricarpus vulgaris*. Grows from 3 to 5 feet and much the same style as above excepting the berries are much smaller and red and persist thru the Winter until Spring. The foliage turns red in Autumn. A very satisfactory shrub in all situations and both varieties are very easily grown.

2 to 3 feet.....\$.70 each

3 to 4 feet......80 each

SNOWBERRY, MOLLE. *Symphoricarpus mollis*. Grows to 5 feet. Resembles *vulgaris* but much lower growth. Much used in foreground of shrubberies.

2 to 3 feet.....\$.85 each

SUMACS, RHUS

One of the best known and finest group of shrubs in cultivation. Planted for the beauty of their foliage and branching. Probably the most popular shrub for Fall colors. Will thrive under most all conditions and can be grown nearly everywhere. Much used for foundation planting but should be used in groups in back-grounds.

SMOOTH SUMAC. *Rhus glabra*. Grows to good height, 10 to 15 feet. Gorgeous Autumn tints and crimson fruit. Plant in masses or borders.

3 to 4 feet.....	\$.85 each
4 to 5 feet.....	1.00 each

CUT LEAF SUMAC. *Rhus typhina laciniata*. Deeply cut leaves. Much like the above. Plant in mass or border. The most popular of the sumacs.

2 to 3 feet.....	\$.85 each
3 to 4 feet.....	1.00 each

FRAGRANT SUMAC. *Rhus canadensis*. Much like Smooth Sumac with larger blossoms in Spring followed by dense clusters of red fruits attractive to birds. Leaves and blossoms fragrant. Not always hardy.

4 to 5 feet.....	\$1.50 each
------------------	-------------

STAGHORN SUMAC. *Rhus typhina*. Lacy, finely cut leaf and velvety stems. Grows to great heights, reaching 18 to 20 feet. Plant in masses for brilliant Fall coloring.

2 to 3 feet.....	\$.65 each
3 to 4 feet.....	.85 each
4 to 5 feet.....	1.00 each

SWEET SHRUB. *Calycanthus floridus*. A choice shrub 5 to 7 feet bearing chocolate colored blossoms and a delightful fragrance. Blooms in June and can be used to follow the numerous early blooming shrubs. Excellent for foundation planting. Not always hardy.

18 to 24 inches.....	\$1.00 each
2 to 3 feet.....	1.25 each

The Tamarix are shrubs much used as points of emphasis and backgrounds in Landscape Gardening. Tall, with fine feathery foliage, they lend a tropical air to the entire design. Will stand almost any amount of alkali.

TAMARIX HISPIDA. Bluish green leaves with pink flowers. 4 to 5 feet.

4 to 5 feet.....	\$1.00 each
------------------	-------------

TAMARIX ODESSANA. Medium height to 16 feet. Pink flowers from July to September.

4 to 5 feet.....	\$1.00 each
------------------	-------------

THE VIBURNUMS

In this group we find some of the most splendid shrubs known. All that we list are very hardy and willing to stand some shade though of course they do better in full sun. The blossoms and berries run the entire season from early Spring until Fall. Nearly all possess handsome foliage brilliantly colored in Autumn in addition to the decorative fruits and striking blossoms. They are nearly all large shrubs and are becoming better known and appreciated every season. The following varieties will flourish with a minimum of attention and should be planted without stint as they are sure to be very satisfactory.

AMERICAN HIGH BUSH CRANBERRY. *Viburnum americanum*. A tall spreading shrub growing to 10 feet with lobed foliage of great beauty. White blossoms in large flat clusters developing into brilliant red berries that persist until Spring. Very effective in mass planting or as a specimen.

2 to 3 feet.....	\$1.25 each
3 to 4 feet.....	1.50 each

ARROWWOOD. *Viburnum dentatum*. An upright shrub to 15 feet with glossy leaves and white blossoms in cymes, three inches across in June. Fruits bluish black.

2 to 3 feet.....	\$1.00 each
3 to 4 feet.....	1.25 each

WAYFARING TREE. *Viburnum lantana*. Resembles *Viburnum dentatum* in flower and fruit but a larger shrub with slightly different foliage and will grow in much drier soils.

2 to 3 feet.....	\$1.00 each
3 to 4 feet.....	1.25 each

SHEEPBERRY. *Viburnum lentago*. Characteristic *viburnum* foliage and white flowers followed by bluish black fruits with white bloom which endure thru the Winter until Spring.

3 to 4 feet.....	\$1.25 each
4 to 5 feet.....	1.50 each

EUROPEAN CRANBERRY. *Viburnum opulus*. Smooth, light barked shrub growing to 10 feet. Larger cymes of white flowers precede the red berries. Good specimens.

2 to 3 feet.....	\$1.25 each
3 to 4 feet.....	1.50 each

SNOWBALL. *Viburnum sterile*. The familiar favorite snowball of gardens for generations past. Large white flowers always a welcome sight. Spray with nicotine solution as soon as plant lice appear. Blooms in early June.

2 to 3 feet.....	\$1.00 each
3 to 4 feet.....	1.25 each

WITCH HAZEL. *Hamamelis virginiana*. Outstanding as one of the finest Fall shrubs growing to a great height in naturalistic plantings or borders. Thrives in deep shade and blooms latest of them all with a very pretty yellow blossom. Bark stays green thru the Winter. If you have a place too shady for other shrubs, try witch hazel. Not always hardy.

2 to 3 feet.....	\$1.00 each
3 to 4 feet.....	1.25 each

WEIGELA. *Eva Rathke.* Not altogether hardy here but well worth trying. An abundance of carmine red bell-shaped flowers scattered over the whole shrub thru a long blooming period.

2 to 3 feet.....\$1.25 each
3 to 4 feet..... 1.50 each

WEIGELA, rosea. Something similar to above but taller growing and bearing pink flowers in great profusion.

2 to 3 feet.....\$1.25 each
3 to 4 feet..... 1.50 each

WILLOW, COLORADO BLUE. *Salix irrorata.* An unusual native shrub or small tree of dense habit and a decided blue coloring of stout twigs. Can be planted anywhere and is especially fine with the yellow twigged or other bright colored shrubs.

3 to 4 feet.....\$.85 each

WILLOW, TEA. *Salix tetrapala.* A shrub willow with shiny leaves and bright green stems. Of pussy willow type. Leaves persist into Winter.

3 to 4 feet.....\$.85 each
4 to 5 feet..... 1.00 each

WILLOW, PUSSY. *Salix discolor.* A large growing shrub, with the furry catkins very early in Spring. Green bark in Winter.

3 to 4 feet.....\$.85 each

TREES

Shade is very essential to our comfort and trees are the natural method of obtaining it. Properly placed they are the decoration of our outdoor living rooms. We appreciate them far more than we realize; relieving us, as they do, of the glare and heat of the sun and breaking the chill Winter winds.

They are a splendid investment for as they grow older they become more valuable and there is nothing that will increase the value of property, considering the initial expense, as rapidly as judicious planting of trees and shrubs.

ASH, GREEN. *Fraxinus lanceolata.* A rapid, rather open growth tree. Can be used to good advantage as a street tree, lawn specimen or in forest and background planting. One of the best for arid or semi-arid countries.

1¼ to 1½ inch.....\$2.50 each
1¾ to 2 inch..... 3.00 each

ASH, WHITE. *Fraxinus americana.* Smooth gray bark and a nice leaf arrangement. Fairly rapid grower. Good head. Fine for parkings.

8 to 10 feet.....\$2.00 each
1¼ to 1½ inch..... 3.00 each

BIRCH, AMERICAN WHITE. *Betula populifolia.* Rather a small tree with smooth white bark, growing well under more adverse condition than the other birches. Leaves purple when small, growing green with age.

5 to 6 feet.....\$2.00 each
6 to 8 feet..... 3.00 each

BIRCH, CUT LEAF. *Betula alba pendula laciniata*. One of the most beautiful specimens for lawn planting. Silvery bark and graceful drooping habit. Foliage finely cut and abundant. The queen of the lawn. These trees are lifted with a ball of earth to insure their living.

4 to 5 feet.....	\$ 5.00 each
5 to 6 feet.....	7.00 each
6 to 8 feet.....	10.00 each

CATALPA, BUNGEI. Round head Catalpa. Rather low growing tree with clusters of white flowers, large heart shaped leaves and straight stems. Not always hardy.

5 to 6 feet.....	\$4.00 each
------------------	-------------

CATALPA, SPECIOSA. A tall, rapid growing tree easy to transplant and not particular as to soil. Possesses large leaves thru the season and beautiful large white flowers in Spring. Very useful in forest or naturalistic plantings. Long fruit pods make it especially attractive in the winter landscape.

8 to 10 feet.....	\$1.75 each
1½ to 2 inch.....	2.75 each

Also large sizes. Write for prices.

COTTONLESS COTTONWOOD. *Populus angustifolia*. A native of Rocky Mountain States and not the male of the species deltoides. This tree never has cotton and is a splendid variety for large plantings in arid countries.

8 to 10 feet.....	\$1.50 each
1½ to 2 inch Caliper.....	\$2.50 each

Write for prices in larger quantities.

ELM, CHINESE. *Ulmus pumila*. A new introduction and a very valuable one. Very rapid growing, often attaining a height of 30 feet in eight years. A splendid formed elm with small persistent foliage, budding early and very hardy. Probably the best adapted tree to our Western conditions. We are fortunate in having some splendid straight stemmed well headed stock at the following low prices:

5 to 6 feet.....	\$1.50 each
6 to 8 feet.....	2.50 each
8 to 10 feet.....	3.00 each
10 to 12 feet.....	4.00 each

ELM, AMERICAN. *Ulmus americana*. The most popular of all ornamental trees and justly so. Easily grown with immense symmetrical heads supporting a drooping canopy of foliage. Arches high over streets and house tops leaving plenty of space for air currents. Does not obstruct view of traffic. The standard parking tree over the North half of the U. S.

8 to 10 feet.....	\$2.25 each
1¼ to 1½ inch.....	3.00 each
1½ to 1¾ inch.....	4.25 each
1¾ to 2 inch.....	5.50 each

We have in the nursery a number of large specimen Elm trees (*Ulmus americanum*) ranging from 6 to 14 inches in diameter. These trees are properly pruned, assuring splendidly branched tops and may be safely moved. Any one desiring shade trees already grown should inspect these. Prices on application.

FLOWERING CRAB, BECHTELI. *Malus ioensis* var. *Bechtels*. One of the very best specimen trees for the lawn. Large double pink flowers that are very fragrant. A splendid tree to plant close to the play lawn.

2 to 3 feet.....	\$2.00 each
3 to 4 feet.....	2.50 each
4 to 5 feet.....	3.50 each

APPLES for fruit. See page 19.

HACKBERRY. *Celtis occidentalis*. Hardy tree with wide spreading head and light green foliage making a splendid shade tree. Not bothered by insects.

6 to 8 feet.....	\$2.25 each
8 to 10 feet.....	2.75 each

HAWTHORN BUSH. *Crateagus coccinea*. A very ornamental though somewhat shrubby tree. Very hardy. Branches spiny and close growing, making a compact head. Very ornamental pear shaped red berries in Autumn. Fine formal tree for the lawn.

3 to 4 feet.....	\$2.00 each
------------------	-------------

HAWTHORN, COCKSPUR. *Crateagus crus galli*. A thorn tree with wider spreading branches growing up to 30 feet. Thorns slightly curved. A splendid tree for grouping or lawn specimens with fine foliage. Fragrant white blossoms followed by orange red fruits in Fall. Very effective in large shrubberies and in forest planting.

2 to 3 feet.....	\$2.00 each
------------------	-------------

HAWTHORN, DOWNY. *Crateagus mollis*. A splendid ornamental tree growing to 25 feet. Has large bright green leaves and myriads of fragrant white blossoms followed by red fruits in September. Another fine lawn tree.

2 to 3 feet.....	\$1.50 each
------------------	-------------

Also *Crateagus cordata*, *Crateagus coloradensis* and *Crateagus rivularis*.

MAPLE, NORWAY. *Acer platinoides*. Very effective with Bolleana poplar to create a proper vista and sky line in planting. Fine for street planting wherever hardy.

8 to 10 feet.....	\$3.50 each
-------------------	-------------

MAPLE, SOFT. *Acer dasycarpum*. A splendid quick growing tree for any situation. Shade in a few years from a small start. Underside of leaf silvery. Foliage deeply cut.

8 to 10 feet.....	\$2.00 each
1¼ to 1½ inch.....	2.50 each

MAPLE, AMUR. *Acer Ginnala*. More of a shrub than a tree. Valuable in background of shrubberies. Beautifully colored foliage in Autumn.

4 to 5 feet.....	\$1.50 each
------------------	-------------

MAPLE, SCHWEDLERS. *Acer schwedleri*. The finest of maples, but not always hardy.

6 to 8 feet.....	\$5.00 each
------------------	-------------

MAPLE, WIERS CUTLEAF. *Acer Wieri*. A splendid specimen tree with finely cut foliage.

5 to 6 feet.....	\$3.00 each
------------------	-------------

LINDEN, AMERICAN OR BASSWOOD. *Tilia americana*. A tree with a compact, conical head and large leaves. Rapid growing and easily transplanted. A good all around shade tree. Does best in moist locations.

8 to 10 feet.....\$3.50 each

HONEY LOCUST. *Gleditsia triacanthus*. One of our most common trees and one that will grow nearly everywhere. Especially valuable under poor growing conditions. Very ornamental foliage.

8 to 10 feet.....\$2.25 each

MULBERRY, RUSSIAN. *Morus alba* var. *tatarica*. A rapid low growing tree with excellent foliage and edible fruits. Attractive to birds. Do not plant where fruits will be a nuisance.

3 to 4 feet.....\$.75 each

MOUNTAIN ASH. *Sorbus aucuparia*. A beautiful specimen tree for lawns. Handsome foliage and large, flat corymbs of white flowers in May followed by clusters of brilliant orange red berries in August and September. Birds are attracted by berries. Very hardy.

6 to 8 feet.....\$2.00 each

8 to 10 feet..... 2.50 each

OAK, GAMBELL'S. *Quercus Gambelli*. A dwarf native Oak of great beauty. Much resembles White Oak in foliage and bark of tree.

6 to 8 feet.....\$2.50 each

OAK PIN. *Quercus palustris*. One of the finest Oaks for ornamental purposes and about the most rapid growing.

8 to 10 feet.....\$3.50 each

PIN CHERRY. *Prunus pennsylvanica*. A fine hardy native tree with cherry-like blossoms on slender stems. Bark of tree is reddish making a good showing in Winter. Will grow in nearly all soils and in nearly all localities. Can either be massed or planted for a specimen tree.

4 to 5 feet.....\$1.75 each

ROCKY MOUNTAIN CHOKE CHERRY. *Prunus melanocarpa*. A small native tree of great value in landscaping. Nicely formed with brilliantly colored foliage in Autumn. Fruit edible and attractive to birds.

5 to 6 feet.....\$2.00 each

COMMON CHOKE CHERRY. *Prunus virginiana*. Much the same as above with a rough speckled bark and more of a shrub growth.

5 to 6 feet.....\$1.25 each

PLUMS, COMMON WILD. *Prunus americana*. A spreading tree with angular branches and some thorns but perfectly hardy anywhere. Used in naturalistic planting. Very effective and has fragrant blossoms.

6 to 8 feet.....\$1.50 each

PLUMS, for fruit see page (20).

For DWARF FLOWERING PLUMS see page (8).

POPLAR BOLLEANA. *Populus bolleana*. The finest tall growing, erect stemmed, formal tree for the West. Rapid growing, long lived with a splendid shaped top. Bark remains green throughout the year. Plant for background, skyline and relief in mixed plantings.

6 to 8 feet.....\$2.00 each
8 to 10 feet..... 2.50 each

POPLAR CAROLINA. *Populus eugenei caroliniana*. A fast growing shade for temporary purpose as it is short lived. Makes good head and is not particular as to soil.

8 to 10 feet.....\$1.00 each

POPLAR LOMBARDY. *Populus nigra italica*. A tall columnar form with branches starting almost at the ground. Very rapid growing and used extensively in formal planting and for tall screens.

8 to 10 feet.....\$1.25 each
1¼ to 1½ inch..... 2.25 each

RUSSIAN OLIVE. *Eleagnus angustifolia*. The same as shrub but tree form.

2 to 2½ inch caliper.....\$2.50 each

TREE OF HEAVEN. *Ailanthus glandulosa*. When young this tree resembles Smooth Sumac in form but grows rapidly to 20 or 30 feet. Can be kept free of branches and planted against brick walls with perfect safety. Not always hardy here.

4 to 5 feet.....\$1.25 each

WALNUT, BLACK. *Juglans nigra*. Valuable for its fruits and one of the most beautiful shade trees we have.

6 to 8 feet.....\$2.00 each

WILLOW, LAUREL. *Salix pentandra*. A rapid growing tree with bright green bark. Fine to relieve Winter monotony of grays.

6 to 8 feet.....\$1.50 each
8 to 10 feet..... 2.50 each

WILLOW, NIOBA WEeping. *Salix alba nioba*. The golden weeping willow commonly used in lawns. Very hardy and a good specimen tree.

4 to 5 feet.....\$1.25 each
8 to 10 feet..... 2.50 each

FRUITS

Nearly every home place has room for the planting of at least two fruit trees and some small fruit. The trees in bloom are a great source of satisfaction and the fruit a source of income. We are only recommending the varieties known to be hardy in Colorado. Plums are the most satisfactory tree fruit as they bear oftener and the trees are longer lived. Grapes and all small fruits do well here with proper care.

FALL AND WINTER APPLES

Any of the varieties listed.

3 to 4 feet.....\$.65 each
4 to 5 feet..... .80 each

DELICIOUS. Unsurpassed in quality and one of the best known new varieties.

JONATHAN. The familiar Fall apple. Fine red, but not a good keeper.

WINESAP. Another well known tried variety of red apple and a splendid keeper.

WEALTHY. A very hardy Fall apple good for cooking, eating or drying.

RED JUNE. Best early apple for immediate use. Very hardy and prolific bearer. Earliest.

YELLOW TRANSPARENT. Best keeping early apple and very hardy. One of the most satisfactory apples in this region.

Additional varieties:

McINTOSH RED
ROME BEAUTY
YORK IMPERIAL
GANO
SPLENDID GOLDEN

CRAB APPLES

Any of the varieties listed:

3 to 4 feet.....\$.65 each
4 to 5 feet......85 each

FLORENCE. The hardiest crab and a fine ornamental tree.

HYSLOP. An old variety and a fine jelly maker.

WHITNEY. The largest crabapple, very hardy and good eating, either cooked or raw.

CHERRIES

A very satisfactory fruit in this country. Will do well on side hills or anywhere that the ground is not swampy. Bears very early.

Any of the varieties listed.

3 to 4 feet.....\$1.00 each
4 to 5 feet.....1.25 each

LARGE MONTMORENCY. The best known variety in Colorado. Large, red and juicy fruits.

EARLY RICHMOND. Much like the above but ten days earlier.

ENGLISH MORELLO. Fruit dark red. Favorite for canning. Later than Montmorency.

PLUMS

Plant them in preference to any other fruit, as they bear more regularly than any other fruit.

COMPASS CHERRY. A hybrid bearing fruit of a dark wine red, juicy and fine flavored. Very hardy.

3 to 4 feet.....\$.65 each

UNDERWOOD PLUM. A large early plum. Juicy sweet and of the semi cling variety. A very satisfactory all around fruit.

3 to 4 feet.....\$.65 each
4 to 5 feet......90 each

WILD GOOSE PLUM. An American hybrid of extreme hardiness and good flavor. A splendid tree either in the home garden or commercial orchard. Red fruit.

3 to 4 feet.....\$.65 each
4 to 5 feet......90 each

GRAPES

Plant on south hillside. Makes no difference how steep it is. Almost sure to bear a good crop.

2-year old Vines. Any variety.

\$.35 each or 10 for \$2.50

BETA. A hybrid grape. Very hardy and good flavor though small. Very good as an ornamental vine.

CONCORD. The old standby or blue black grape. Good flavor and good bearer.

MOORES EARLY. An exceptionally early fine large blue black variety and surest, for this area of the blue blacks. Like Concord but two or three weeks earlier.

NIAGARA. Occupies much the same position among white grapes that Concord does among blue black varieties.

RASPBERRIES

A universally liked fruit. Easily raised.

CUMBERLAND. This is the finest of the black caps. Hardy and a very prolific bearer.

\$.15 each. 10 for.....\$.75

ST. REGIS. Everbearing. A true everbearer and perfectly hardy. Red, sweet, juicy and a splendid bearer thru the season.

\$.15 each. 10 for.....\$.75

BLACKBERRIES

EARLY HARVEST. Finest early blackberry for home use. Plant both this variety and Snyder, and harvest a succession of luscious fruits.

\$.15 each. 10 for.....\$.75

SNYDER. A later berry but a very fine one, larger than above and well worth planting.

\$.15 each. 10 for.....\$.75

CURRANTS

WHITE GRAPE. The sweetest and best currant for the West. Splendid as a dessert or for jelly making. 2 yr. old plants only.

\$.25 each. 10 for.....\$2.00

GOOSEBERRIES

HOUGHTON. The best market variety and a wonderful producer. 2 yr. old plants.

\$.25 each. 10 for.....\$2.00

PEARL. The finest for home consumption. Large pale green berries and an abundance of them. 2 year old plants.

\$.25 each. 10 for.....\$2.00

If desiring fruit trees or small fruits in quantities it will pay you to write for special prices, stating amounts you can use.

CEDARS—JUNIPERUS

A very worthy group of evergreens used extensively in landscape planting. There are found among these nearly any desired form from the ultra formal to the most informal. Colors range from a dark green to silvery blue. Height from the tallest of pyramidal trees to prostrate varieties that creep close to the earth. The best known and most popular class of fine evergreens and perfectly hardy.

CHERRYSTONE JUNIPER. *Juniperus monosperma*.

An unusual evergreen of pyramidal shape and a solid gray green color holding its color throughout the year. Rarely reaches over twenty feet in height. A beauty for the rock garden or low backgrounds.

1½ to 2 feet.....	\$5.00 each
2 to 2½ feet.....	6.50 each
2½ to 3 feet.....	8.00 each

JAPANESE TRAILING JUNIPER. *Juniperus chinensis procumbens*. A blue green type growing about 12 inches high and 4 to 5 feet in diameter. Has silvery appearance due to white leaf markings. Never changes color and is the best of the low growing types. Splendid for edging, covering slopes or wherever a ground cover is desired. Perfectly hardy.

18 to 24 inches.....	\$ 6.00 each
24 to 30 inches.....	9.00 each
30 to 36 inches.....	12.00 each

PFITZERIANA. *Juniperus chinensis pfitzeriana*. A splendid loose, low growing type. Perfectly hardy. Makes wonderful border. Green color.

1½ to 2 feet.....	\$6.50 each
2 to 2½ feet.....	9.00 each
2½ to 3 feet.....	12.00 each
3 to 3½ feet.....	15.00 each

SAVIN JUNIPER. *Juniperus sabina*. The most beautiful of the low growing type. Numerous fan shaped branches. Either formal or informal planting. Fine background for flowering plants.

1½ foot.....	\$5.00 each
2 foot.....	6.00 each
2½ foot.....	7.50 each
3 foot.....	10.00 each

SPINY GREEK JUNIPER. *Juniperus excelsa stricta*. A slender growing variety but tapering from ground to tip, steely color and very formal.

1½ foot	\$4.50 each
2 feet	6.00 each

TAMARIX LEAVED JUNIPER. *Juniperus sabina tamariscifolia*. A very compact, low growing evergreen of the sabina type. Bluish color that never changes. To be used in front of taller evergreens and edging of borders.

12 to 18 inches.....	\$5.00 each
18 to 24 inches.....	7.50 each

RED OR VIRGINIA CEDARS. An especially hardy evergreen of compact pyramidal habit. Foliage is green, turning red in Winter and is one of the very best formal trees. The most commonly grown of the cedars. Rapid growth to 70 or 80 feet.

2 feet.....	\$3.00 each
-------------	-------------

Big Clipped Dense Trees.

4 to 5 feet.....	\$ 7.50 each
5 to 6 feet.....	12.00 each

SILVER CEDAR. *Juniperus virginiana scopulorum*. The choicest of the large growing cedars. Habits much the same as above except color is always silvery. The very best for formal planting or as a specimen. Excellent to use near corners of lily pools, pergolas, garden seats or any other architectural feature.

2 to 2½ feet.....	\$ 7.00 each
2½ to 3 feet.....	8.50 each
3 to 3½ feet.....	10.00 each
3½ to 4 feet.....	12.00 each
4½ feet.....	13.50 each
5 feet.....	15.00 each
6 feet.....	18.00 each

PINES

Long needled evergreens very easily grown if once established. Too coarse for small plantings but valuable for relieving monotony of color and form in large plantings. The Mugho and Montana are very well adapted to formal or small plantings.

AUSTRIAN PINE. *Pinus austriaca nigra*. A long needled pine of splendid form, branching from the ground upward. Color a dark green appearing at times to be nearly black.

Specimen trees. 3 to 4 feet.....\$7.00 each

MUGHO COMPACTA. Most ornamental dwarf commonly grown. Invaluable in rockeries.

12 inches high.....	\$ 4.00 each
14 to 16 inches.....	5.00 each
18 to 24 inches.....	7.50 each
24 to 30 inches.....	12.00 each

SCOTCH PINE. Long needled, quick growing and very symmetrical evergreen. Branches low, from the ground up.

2 to 3 feet.....	\$3.50 each
3 to 4 feet.....	4.50 each
4 to 5 feet.....	7.00 each

SWISS MOUNTAIN PINE. *Pinus montana*. A very slow growing fine needled pine much like the mugho but reaching a very good height. Fine for the rock garden or close to architecture. We are offering real specimen stock at

2½ feet	\$ 8.00 each
3 feet	12.00 each

WESTERN YELLOW PINE. *Pinus ponderosa*. The familiar evergreen with long needles and reddish bark growing throughout the Rocky Mountains at low altitudes. Splendid for large groupings.

2 to 3 feet.....	\$ 4.00 each
3½ feet.....	5.00 each
4 feet.....	7.50 each
5 feet.....	12.00 each

SPRUCES

This family of evergreens contains some of our best ornamental varieties. Colorado Blue Spruce is probably the most admired tree of all evergreens, taking the United States as a whole. Colorado is the natural habitat of a number of valuable varieties and can produce, in the nursery, the finest specimens known.

They nearly all reach great heights so a little care must be exercised in choosing the site for planting.

BLACK HILLS SPRUCE. *Picea canadensis albertiana*.

A slow growing very hardy type of spruce dark green in color. Bushy compact habit and a splendid specimen tree.

2 to 2½ feet.....	\$4.00 each
2½ to 3 feet.....	5.00 each

COLORADO BLUE SPRUCE. *Picea pungens glauca*.

The finest of the native spruces. Grows to great heights. Color a glorious steely blue. A tree of perfect outline and the best known evergreen in this region. Nursery grown specimens are always more satisfactory to the purchasers than collected stock as they are kept in perfect form and are much more easily transplanted. We are very careful to select true blue color and compact growth for our customers.

Specimen trees. 2 to 2½ feet....	\$ 6.50 each
Specimen trees. 2½ to 3 feet....	8.00 each
Specimen trees. 3 to 3½ feet....	10.00 each
Specimen trees. 3½ to 4 feet....	12.00 each

COLORADO SPRUCE. Green type. This is a variation of the above but of a deep green color. Much more plentiful than the blue.

2 to 2½ feet.....	\$4.00 each
2½ to 3 feet.....	5.00 each
3 to 3½ feet.....	6.00 each
3½ to 4 feet.....	8.00 each

KOSTERS BLUE SPRUCE. *Picea pungens kosteriana glauca*. The finest type of Blue Spruce grafted on blue spruce seedlings. Always the same color and the finest specimen trees known. Very rare.

4½ feet.....	\$50.00 each
5½ feet.....	65.00 each
6½ feet.....	75.00 each

VINES

Climbing vines are essential to comfort and beauty. With their handsome foliage, striking blossoms and pendant fruit, they are the mellowing touch by which crude angles and unsightly objects are mercifully softened and concealed. In fact their uses are only limited by our ingenuity in planting.

BITTERSWEET, American. *Celastrus scandens*. Used for the effect given by bursting of seed pod exposing scarlet seeds. Especially good on steep banks to check erosion.

2 yr. old.....\$.60 each

EVERGREEN BITTERSWEET. *Evonymus radicans*. A true broad leaf evergreen that will grow in Colorado if not over exposed to the Winter's sun. Slow starting. Takes at least two years to start vining.

2 yr. old.....\$.85 each

CLEMATIS JACKMANNI. Best vine with purple flowers but a little difficult to start here. Well worth any amount of care required. We sell these in 4 inch pots only.

2 yr. old.....\$1.50 each

CLEMATIS HENRYI. Much like C. Jackmanni with large white flowers. In 4 inch pots.

2 yr. old.....\$1.50 each

CLEMATIS PANICULATA. A strong growing vine bearing a profusion of fragrant white flowers thru a long season of bloom. Especially fine planted with Grapes on pergolas.

2 yr. old.....\$1.00 each

DUTCHMAN'S PIPE. *Aristolochia siphon*. A very satisfactory vine with large leaves giving dense shade. Blossoms are pipe-shaped and purple. Hard to start in some situations. Not always hardy.

2 yr. old.....\$1.25 each

GRAPES. See Fruits, Page 21.

A combination of beauty and utility.

BETA GRAPE. A very hardy early maturing grape and especially useful on pergolas and arbors. Fruit ripens in September and are highly valued for jellies and preserves.

2 yr. old.....\$.35 each

HONEYSUCKLE, EVERGREEN. *Lonicera sempervirens*. A low growing honeysuckle grown for the scarlet berries showing splendidly against bright green thick leaves. Excellent for planting along fences.

2 yr. old.....\$.50 each

HONEYSUCKLE, HALLS. *Lonicera japonica* var. *halleana*. Profusion of white fragrant blossoms changing to yellow. Requires trellis or other support but an excellent shade. Quick, strong growing.

2 yr. old.....\$.50 each

IVY, BOSTON. *Ampelopsis veitchii*. Not as hardy as *A. engelmannii* but with proper planting and plenty of water they will grow fairly well. The dry Winter Winds and sun are their worst enemies.

2 yr. old.....\$.75 each

IVY, ENGLEMAN. *Ampelopsis englemanni*. Our most valuable ornamental vine with its ability to climb any but very smooth surface without aid. Bears gloriously colored foliage in Autumn. Useful in covering bare walls, unsightly objects, old tree stumps, etc. Very easily grown.

2 yr. old.....\$.40 each

IVY, ENGLISH. In shaded, sheltered places the English Ivy will do exceedingly well. Its glossy evergreen foliage makes it especially valuable.

From pots\$.50

MATRIMONY VINE. *Lycium chinensis*. A prostrate shrub of rank growing habit. Purple flowers in late Summer followed by bright red fruits. Especially adapted to planting on unsightly banks that are subject to erosion.

2 yr. old.....\$.75 each

SILVER LACE VINE. *Polygonum aubretia*. A hardy, strong growing vine of great beauty, covered with clouds of fragrant white blossoms in July and August.

2 yr. old.....\$1.00 each

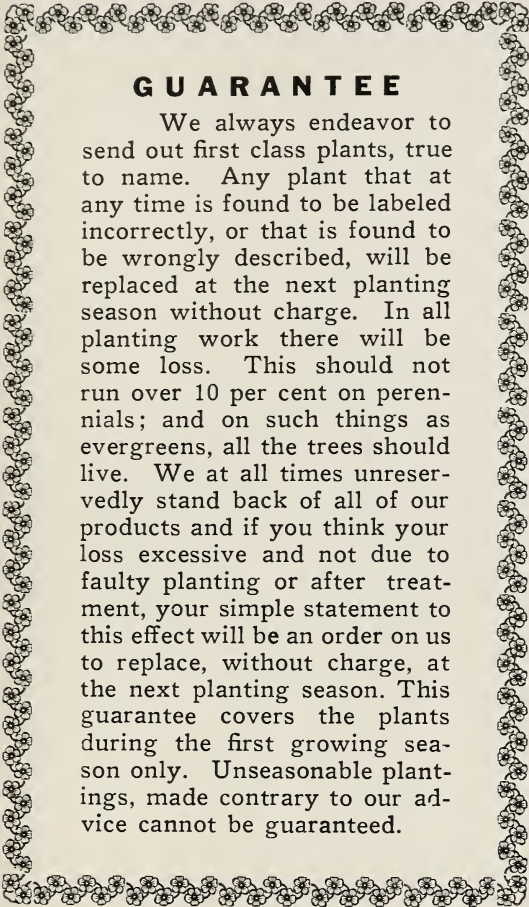

TRUMPET VINE. *Bignonia radicans*. A strong rapid growing vine with striking crimson orange trumpet shaped blossoms. Will grow anywhere, clinging to walls without support.

2 yr. old.....\$.75 each

Read the following Guarantee

GUARANTEE

We always endeavor to send out first class plants, true to name. Any plant that at any time is found to be labeled incorrectly, or that is found to be wrongly described, will be replaced at the next planting season without charge. In all planting work there will be some loss. This should not run over 10 per cent on perennials; and on such things as evergreens, all the trees should live. We at all times unreservedly stand back of all of our products and if you think your loss excessive and not due to faulty planting or after treatment, your simple statement to this effect will be an order on us to replace, without charge, at the next planting season. This guarantee covers the plants during the first growing season only. Unseasonable plantings, made contrary to our advice cannot be guaranteed.
